

中国硅酸盐学会绝热材料分会

Thermal Insulation Materials Branch of Chinese Ceramic Society

Colleagues in VIPA:

Glad to contact with you!

We are going to organize a Sino-European communication trip of VIPs to Europe in the middle of this November, and we hope that the first stop of the trip would be the global office of VIPA in Brussels, maybe we could hold a symposium to communicate to each other.

And we wonder if you could invite some core members of VIPA in Europe to join the symposium in Brussels. I believe some of your members would like to know the VIPs market in China, and the symposium is open and free to all the members in VIPA.

Here is what VIPA would get:

- We will prepare a speech on the symposium (The current marketing & standardization situation in Chinese VIPs industry).
- We will provide a free qualification of The Academic Conference of China Insulating Materials Industry in 2020, and VIPA could give a 30min's speech on the event.
- We are very pleased to help you to organize the IVIS 2021 if you would like to come to China then. We have 600+ insulation material companies as our member for now. The Chinese market is so big and we believe that it will expand the influence of VIPA in China.
- Something else if you mentioned.

And here is what VIPA should do:

- To find some applications & cases of VIPs on architecture in Europe, we are going to visit the cases after the symposium and communicate with the technical person in charge.
- To prepare a speech on the symposium to introduce the current marketing situation of VIPs around the world
